

SERenderObject< T >

```
classDiagram
    class SEModel["SEModel< T >"]
    class SERenderObject["SERenderObject< T >"]
    SEModel --|> SERenderObject
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'SEModel< T >'. A blue arrow points vertically upwards from this box to a white box labeled 'SERenderObject< T >' at the top. This represents that SEModel inherits from SERenderObject.
