

SEPrimitive< T >

SERenderObject< T >

SETeapot< T >

```
graph BT; SETeapot[SETeapot< T >] --> SEPrimitive[SEPrimitive< T >]; SETeapot --> SERenderObject[SERenderObject< T >];
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded box labeled 'SETeapot< T >'. Two blue arrows originate from the top of this box: one points diagonally up and to the left to a white box labeled 'SEPrimitive< T >', and the other points diagonally up and to the right to a white box labeled 'SERenderObject< T >'. This indicates that 'SETeapot' inherits from both 'SEPrimitive' and 'SERenderObject'.
